LUMBER SALES

# WynnWood Siding

Now is the time to experience the warmth and everlasting comfort of genuine solid wood siding. Enjoy the natural beauty and unrivaled rustic charm of spruce, pine or Western larch sidings today and marvel at the natural grain pattern in each piece of **WynnWood Siding**.

Our sidings are all kiln-dried and conditioned to be completely stable. They are available in a variety of patterns — some of which are unique to the **WynnWood** line. Once run to pattern, an acrylic primer is baked onto the surface, and with the application of a custom coloured acrylic top coat, it is ready for your home. Western Larch is unique to our geographical area, is amazingly durable, and may be just the right fit for your home. Its uniform, golden brown hues and incredibly tight small knots make it the perfect choice for upscale natural applications.

At Wynndel Box and Lumber we have addressed the concerns of both maintenance and high cost of traditional wood sidings by producing our new unique lines of pre-primed, pre-finished and natural **WynnWood Siding**. If you are ready to add style and sophistication to your home, try our unique rough-sawn **WynnWood Siding** today.

## Features of WynnWood Siding

Factory primed

- Application of Fargo 2000 acrylic copolymer by our state of the art vacuum coater
- Fargo low sheen finish 5 year limited warranty
- Readily accepts latex or oil topcoat
- Thermally activated resins in primer are set by gas infrared drier

**#105 Classic drop siding**—an enduring and timeless look.

**#105 Rough faced drop siding**—sawn face provides beautiful contrast as well as superior paint adhesion.

**Thick Dolly Varden** An extra thick bevel siding in 6" and 8" widths with a resawn face and rabbeted back for easy application.

**Log cabin siding 2x8** Adds a bold look to exteriors.

**Channel Rustic** With a classic sawn face and a full 7/8 thickness—provides great stability.
