LUMBER SALES

WoodWynn Trim & Fascia

Nothing can enhance the warmth and beauty of a building more than natural wood trim. For over thirty years, Wynndel Lumber Sales has been selling spruce and pine trim and fascia products and helping homeowners add that special something to their homes.

We have addressed the concerns of high cost and low maintenance by producing our line of pre-primed **WynnWood Trim & Fascia**. Each piece of **WynnWood Trim & Fascia** is designed to accentuate the natural grain pattern of the wood. Each piece of wood is kiln-dried and conditioned to be completely stable, and then carefully sized and rough patterned. A high quality acrylic emulsion is then applied to all four faces, capturing and preserving the look for many years.

Isn't time to give your home that extraordinary elegance it deserves?

Features of WynnWood Trim and Fascia

- The warmth and beauty of natural wood.
- Unique face that has set the industry standard for others to copy.
- Factory primed.
- Application of Fargo 2000 acrylic co-polymer by our state-of-the-art vacuum coater; an environmentally friendly process.
- Fargo low sheen finish - five year limited warranty.
- Readily accepts latex or oil top coat.
- Thermally activated resins in primer are set by an infrared gas dryer.
